

THE METALWORKERS IN ROME ON NOVEMBER 4TH

On November 4th in Rome there will be a large demonstration against work precariousness and for social rights.

Fiom calls on the metalworkers' participation because a new economic and social policy is necessary and because the struggle against precariousness has to be in the first place.

WE DEMAND:

- **The abrogation of Law No. 30** which has caused an unrestrained growth of work precariousness, in order to return to normal open-ended contracts.
- Laws and measures **against wild work delocalization and outsourcing.**
- **The extension of the rights warranted by the Workers' Statute of Rights** to all workplaces.
- **The abrogation of the Boss-Fini Law** which, by binding the permit to stay to the work contract, forces migrants in a condition of complete subordination to the companies.
- **A struggle against** news systems of illegal hiring of low wage work and **concealed labour.**
- **The abrogation of the Moratti Law** for a real right to study in public schools.
- **A new social legislation** warranting a decent life for all.

The metalworkers and the whole labour world suffer more and more from the damages caused by precariousness, which forces young people to uncertainty and low wages, which bears the risk of expelling older people from their workplaces without even a pension, which harms everybody's health and safety.

LET'S GO TO ROME CALLING FOR A DEEP CHANGE AND
FOR A NEW LABOUR LEGISLATION.

STOP PRECARIOUSNESS NOW
WE WANT A SAFE WORK AND LIFE

To take part in the demonstration, get in touch with the local Fiom shopstewards, representatives or offices.
